

# Setting up the Screening Environment

## 1 Download Sound Scouts to an Apple or Android Tablet.

Ensure devices are fully charged, have notifications switched off and have the latest version of Sound Scouts downloaded from the App Store or Google Play.

## 2 Use good quality adult headphones.

Over ear headphones are best for screening in schools. Do not use gaming or surround sound headphones. Ensure headphones are plugged in properly and do not use a splitter.

## 3 Test in a quiet place

Test in a quiet place (indoors) free from distractions. Noisy air conditioners or appliances will impact the results.

## 4 Ensure children are ready to focus before the test

Make sure children are well rested, have been to the bathroom and have blown their nose before starting the test.

## 5 Keep screens and headphones clean between tests

Schools can use antibacterial wipes to clean screens and headphones between tests. Disposable headphone protectors also help to stop the spread of germs.

## 6 Set up the space to minimise distraction

If more than one student is being screened in the same room face desks away from each other to avoid distraction.
